To the Talent Acquisition Team at Grab,

I am writing to express my strong interest in the **Software Engineering Internship** at Grab. As a Software Engineering student at **Nanyang Polytechnic**, I have followed Grab's evolution from a ride-hailing app to a leading super-app. I am eager to contribute my technical skills in Python and Flask, as well as my background in operational reliability, to help drive Southeast Asia forward.

During my studies and independent projects, I have developed a versatile technical toolkit:

- **Full-Stack Development:** I engineered the core backend for **InterGen Connect**, a Flask-based platform. I successfully resolved complex database seeding and CSRF security issues to ensure a seamless user experience.
- **Data-Driven Strategy:** For the **EcoVibe Apparel** project, I utilized Power BI and DAX to conduct market selection and prioritization, demonstrating my ability to turn raw data into strategic insights.
- **Operational Excellence:** My experience as a **Part-time Associate** in logistics and hospitality has instilled in me the discipline, punctuality, and multitasking skills necessary for high-pressure environments—qualities that align with Grab's fast-paced culture.

I am particularly drawn to Grab because of its commitment to solving real-world problems through technology. I am confident that my blend of technical proficiency and "boots-on-the-ground" work ethic makes me a strong fit for your team.

Thank you for your time and consideration. I look forward to the possibility of discussing how I can contribute to Grab.

Sincerely,

Wang Yee Han
